* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The technical feature common to the inventions of claims 1-8, 9-10, 11-13, 14-18, 19-20 is that "a glass substrate optically transparent to light is fixed to a light-emitting surface through a silicon oxide film". However, the international search has revealed that this technical feature that "a glass substrate optically transparent to light is fixed to a light-emitting surface through a silicon oxide film" is not novel since it is disclosed in document JP 2002-158373 A (United Epitaxy Co., Ltd.), 31 May, 2002 (31.05.02) full text and all drawings.

Consequently, the technical feature that "a glass substrate optically
(Continued to extra sheet.)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.

transparent to light is fixed to a light-emitting surface through a silicon oxide film" makes no contribution over the prior art, and therefore cannot be a special technical feature within the meaning of PCT Rule 13.2, second sentence. Therefore, since there exists no technical feature common to all the inventions of claims 1-8, 9-10, 11-13, 14-18, 19-20, no technical relationship within the meaning of PCT Rule 13 between the difference inventions can be seen. Consequently, the inventions of claims 1-8, 9-10, 11-13, 14-18, 19-20 do not comply with the requirement of unity of invention.
